

Purpose of task:

Task 1 - This will help you prepare and understand the key principles of the laws used in the exam module prior to beginning work.

Task 2 – This will identify help you understand more about conditions affecting the human body

Task 1: – Equality, diversity & rights in health & social care– Hand this in to Mrs Archer

For the following legislation identify:

- **What is the Act about?**
- **Who does it protect (i.e. which service users/settings etc)?**
- **What are the basic requirements of the Act**

Legislation to cover

- **Equality Act 2010**
- **Health & Social Care Act 2012**
- **Mental Capacity Act 2005**

TASK 2 — Anatomy & Physiology for health & social care - Hand this task in to Mrs Godwin

- **Research 2 musculoskeletal malfunctions – arthritis & osteoporosis**

Identify & explain: possible causes & effects. The clinical observations that need to be made on the patient, need for blood tests, bone density scans. Supportive treatments such as physiotherapy, exercise, dietary changes, assistive technology. What is the potential impact on their lifestyle as a result of these conditions.

Recommended resources:

Use government websites as well as other relevant sites. Ensure you list websites used, and that they are up-to-date and from the UK. You should aim to **use at least 2 websites for each area of research.**

It is vital that you try to **explain in your own words and not just copy and paste.** Where you do this you must use quotes and reference the quote.

Please **proofread** any work for punctuation (this includes typed work!!)
